II. COMMANDER'S REVIEW AND BRIEFING SECTION			
<p>BRIEFING INSTRUCTIONS. Commanders should discuss training, experience, use of safety equipment, rules, and precautions with personnel participating in high-risk activities. This risk assessment is not intended to prohibit personnel from participating in high-risk activities, but to ensure they are familiar with the hazards and injury potential of these activities. Commanders should ensure personnel wishing to participate in high-risk activities use appropriate safety measures. If commanders determine these personnel are inadequately trained or inexperienced and (or) a threat to safety and the mission exists, they must prohibit these personnel from participating in the activity. However, the commander's role in safety does not replace the individual's responsibility. The individual must exercise sound judgment and self-discipline and not put life, limb, or the performance of his or her Air Force duties in jeopardy.</p>

About the ITAOP/savePDF Method

The traditional Field-by-Field creation process is extremely ineffective and slow.

The only realistic option to create high-quality forms is the Insert-Text-Anywhere-on-Page (ITAOP) method.

The field creation process is about 10,000 times faster than the traditional method; the list of ITAOP features is not even available for the traditional method.

ITAOP savePDF method proved to be very simple and completely reliable for millions of users all over the world (incl. individuals, companies, organizations, government employees).
