

RECOVERED MATERIALS EXEMPTION

PROCUREMENT REQUEST NUMBER _____

The following EPA-designated guideline item does not comply with EPA standards for recycled or recovered materials:
(NOTE: A separate justification must be completed for each noncompliant item purchased as part of this procurement action.)

I have determined that the EPA guidelines were considered and determined inapplicable, base on the following:

Item is not available within a reasonable period of time.

Date Needed _____

Date Available _____

Item fails to meet a performance standard in the specifications. Specifically,

Item is not available from two or more sources. Market research was performed by calling (insert number _____ vendors, but only (enter name) _____ was able to supply the item.

Item was only available at an unreasonable price (i.e., recycled item cost more than nonrecycled item).

Price of recycled item _____

Price of nonrecycled item _____

This determination is made in accordance with FAR 23.405(c).

About the ITAOP/savePDF Method

The traditional Field-by-Field creation process is extremely ineffective and slow.

The only realistic option to create high-quality forms is the Insert-Text-Anywhere-on-Page (ITAOP) method.

The field creation process is about 10,000 times faster than the traditional method; the list of ITAOP features is not even available for the traditional method.

ITAOP savePDF method proved to be very simple and completely reliable for millions of users all over the world (incl. individuals, companies, organizations, government employees).
