About the ITAOP/savePDF Method

The traditional Field-by-Field creation process is extremely ineffective and slow.

The only realistic option to create high-quality forms is the Insert-Text-Anywhere-on-Page (ITAOP) method.

The field creation process is about 10,000 times faster than the traditional method; the list of ITAOP features is not even available for the traditional method.

ITAOP savePDF method proved to be very simple and completely reliable for millions of users all over the world (incl. individuals, companies, organizations, government employees).

NOTES:

1. If the possibility of information becoming sensitive when aggregated with other unsensitive information exists, the OPR(s) should consult the Security Classification Guide and/or Operations Security Officer for assistance.
2. Certain types of information, though unclassified, cannot be released to foreign nationals, foreign governments, foreign contractors or foreign organizations. Please consult your Foreign Disclosure Office or HQ AFSPC/XPI for information on National Disclosure Policy.
3. FOUO information is an extremely broad category. The review process should include the functional areas corresponding to the content of the information itself. If the value of the information is still unclear, then the information SHOULD NOT be Internet accessible. When in doubt, do not put it on the Web!
