

COMBAT ARMS TRAINING AND MAINTENANCE STUDENT CRITIQUE

The mission of the Combat Arms Training and Maintenance (CATM) is to teach the potential combatant the techniques of hitting targets with the first shot. To obtain first shot hits, the shooter must be conditioned physically and mentally. The intent of marksmanship training is to teach the fundamentals of attaining and maintaining proficiency with firearms. We'd like your personal reaction to the course of instruction. Your written comments will help us improve what we teach, how we teach it, and to plan future curriculum changes. Check the block before the word that best describes how you believe we fulfilled our mission.

About the ITAOP/savePDF Method

The traditional Field-by-Field creation process is extremely ineffective and slow.

The only realistic option to create high-quality forms is the Insert-Text-Anywhere-on-Page (ITAOP) method.

The field creation process is about 10,000 times faster than the traditional method; the list of ITAOP features is not even available for the traditional method.

ITAOP savePDF method proved to be very simple and completely reliable for millions of users all over the world (incl. individuals, companies, organizations, government employees).
